PROFILE

I am a Junior Fullstack Engineer. I have skills how to build web application from scratch. I use Node js (express), React Js, Tailwind, MySQL, and other libraries. I'm a quick learner, love challenges that could improve knowledge and skills, and I'm ready to collaborate in a team.

WORK EXPERIENCE

Merchant Care Team Leader

PT Axiata Digital Services Indonesia | September 2018 - August 2021

- Created daily interactive and engaging interaction with merchant through call or message about 80 call/message each day as a team leader Managed schedule and task to daily operation of team by planning the schedule and the task every month

PROJECT EXPERIENCES

Pharmacy App | Link

Fullstack Engineer | June - July 2023

- Pharmacy App is an e-commerce web application for selling products and medicines.
- In this project, I used Express, Multer, Jsonwebtoken, nodemailer, bcrypt, cors, ReactJS, Redux, TailwindCSS, Formik, Yup.
- I use MySQL to manage database

myThreads | Link

Fullstack Engineer | Individual project

- A social media application to share our thought in words.
- In this project, I used NextJS, tailwindCSS, Clerk, Uploadthing
- I use MongoDB to manage database

Kanban App | Link

Fullstack Engineer | Individual project

- A todolist app, as a user, you can create list of your activity that you trying to do. You also can set the deadline time. A notification by email is sent to you once you meet the deadline.
- Technology that I used in this project: Express, Multer, bcrypt, Jsonwebtoken, nodemailer, cors, ReactJS, Redux, TailwindCSS, Formik, Yup, and MySQL.
- I also use CronJob to send notification to email user if they already meet the deadline
